Case 09-567

Site walk commenced at 7:00pm at 608 North Road in the rain.

The existing antenna, garage at 608 North Road, location of balloon test and proposed area for the cell tower were viewed and verified. It was noted by the Board that the proposed tower would fall on the Deslongchamps 2-car garage. The site walk was important in showing actual views as apposed to photographs. The proposed cell tower would be more visible then simulations.

The site walk concluded at 7:25pm

From Ingrid Byrd's verbal notes
Respectfully submitted,
